Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Limitation "two coils on which conductor is wound" is unclear. The coils appear to be wound on the conductor as shown in figures 6, 10. Applicant is requested to review and revise the claim accordingly.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Charpenlier [4176335].

Charpenlier discloses a conductor in which a plurality of plate portions 13A, 13B are connected to each other at portions center taps 2A, 2B; and two coils 5, 6 are wound on the conductor plates portions [figures 1, 1D, 4].

With respect to claim 3, connecting portion of plate portions is utilized as center tap of a transformer [figure 2].

With respect to claim 5, each of plates portions has a lamination of conductor and insulators 12a, 12b, 12c.

With respect to claims 6-8, the plate portion having terminal electrodes corresponding to an end of the coil.

With respect to claim 9, the claim is method counterpart of structure claim 1.

Allowable Subject Matter

5. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 4 recites inter alia, *plate portions to be connected to each other are arranged point-symmetrically about a connecting portion thereof.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hase [4206434]; Dotter, Jr. [4237345]; Charpentier [4159457]; Grahame [3704390]; Wilburn et al. [3546644]; Winn [3775720].
